***REASONS FOR ALLOWANCE***

1. The following is an examiner's statement of reasons for allowance: The prior art taken either singularly or in combination fails to anticipate or fairly suggest the limitations of the independent claim(s), in such a manner that a rejection under 35 U.S.C. 102 or 103 would be proper. The prior art fails to teach a combination of all the claimed features as presented in claim(s) 1-43, wherein a lens barrel comprises a rotary input shaft; a manual operating ring; at least one optical element which is movable along the optical axis by rotation of the manual ring; a hollow-cylindrical output gear; a non-circular cross section portion formed on said rotary input shaft; at least one ball in an accommodation space; and a biasing device, as claimed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

***Conclusion***

2. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

The following references are cited for disclosing a lens barrel comprising a rotary drive mechanism, but these lens barrel do not disclose a rotary input shaft; a manual operating ring; at least one optical element which is movable along the optical axis by rotation of the manual ring; a hollow-cylindrical output gear; a non-circular cross section portion formed on said rotary input shaft; at least one ball in an accommodation space; and a biasing device, as claimed:
